Top stories

Political Deputy Minister in MOST visited Tongtai

The political deputy minister in Ministry of Science and Technology (MOST) and 18 reporters visited Tongtai on May 22 for understanding the technologies and achievements in metal additive manufacturing. Chairman of TTGroup and Tongtai, Mr Yen, introduced the latest metal additive manufacturing solutions and

the development of intelligent machines in Tongtai. In the aspect of additive manufacturing, Yen also explained to the press that the concept of 3D printing is totally different from the traditional machining. Compared to the traditional mass productivity, the biggest difference with 3D printing is the ease

of customization. Therefore, if customers would like to build industrial products by 3D printing, many product designs must be changed. Looking forward the future of 3D printing, the designer needs to consider together the process, equipment, and materials from the beginning of product design.

Tongtai is registered as a technological service organization by iDB

Tongtai has met the requirements of an Automation Engineering Service Organization and been rewarded the certifications from Industrial Development Bureau, Ministry of Economic Affairs, R.O.C. (iDB). Through the certification, Tongtai is eligible to provide the services of Manufacturing Technology, System Integration Planning Technology, and Product Design Technology.

Tongtai participated 2018 Taiwan Automotive Manufacturing Solutions Mission in India

TTGroup participated in the forum of Taiwan Automotive Manufacturing Solutions Mission, which was organized by TAITRA, in India on 14th June, 2018. In the forum, Tongtai represented the latest intelligent manufacturing solutions to the attendees in Delhi, Pune, and Chennai. The

sales manager in India said "Indian government promotes a slogan of Made In India and is getting ready to play an important role in global automotive parts supplying chain. We can estimate the demands of machine tools will grow in near future." Moreover, Honor Seiki, a member

of TTGroup, also has fruitful harvests after the long-term development in India market. Recently, Honor got a USD 3,000,000 contract from the biggest mine crusher group. The machines will be machining the spare parts for large-sized mine crushers.

Exhibitions

APEC participated in 2018 Intermold Nagoya

Asia Pacific Elite Corp (APEC), a member of TTGroup, participated in the 2018 Intermold Nagoya on June. In this exhibition, APEC exhibited automotive molds for showing excellent machining precision to the visitors on-site. APEC already has been involved for more than 15-years, in the domains of aerospace and automotive mold manufacturing. Con-

sidering that Aichi Prefecture has further potential developments and is a critical manufacturing area of automotive industry, APEC expects to catch potential customers' eyes through the exhibition. APEC's products are qualified by international manufacturing companies and the high efficiency machining solutions are already appre-

ciated by worldwide customers.

Events

Overseas Community Affairs Council visited for potential business

The Overseas Community Affairs Council visited Tongtai on May 24. Accompanied by the representatives from America, Canada, Philippines, Indonesia, Malaysia, Japan, Viet-

nam, and Australia, chairman of Tongtai, Mr. Yen introduced the current situation in intelligent machines and is looking forward further cooperation in future.

International press visited TTgroup for TMTS2018

Taiwan International Machine Tool Show (TMTS2018) will be on stage from 7th to 11th on November, 2018. International press visited Taiwan for understanding more about the exhibition. APEC was the representative of TTGroup and explained the products and strate-

gy of TTGroup. Also, APEC especially arranged factory visiting for assisting these reporters to experience the fascinations of machines. Through the explanation, the press were impressed about TTGroup's achievements in the automotive and aerospace industries.

Annual incentive tour

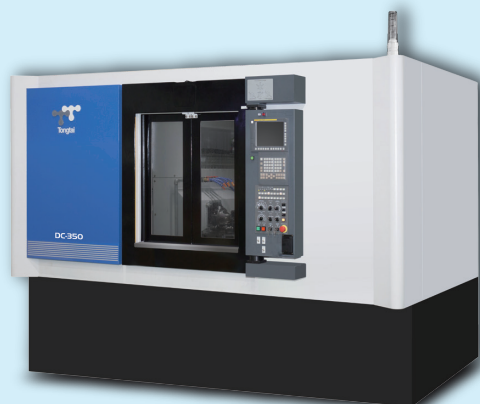

Annual incentive tour was hosted on 16th to 18th June, 2018. This year we went to several popular attractions in Taichung for visiting, hiking, and enjoying the meals. It helps for motivating employees and encouraging them to work and enjoy every moment in Tongtai.

S.P.M for differential housing machining, DC-350

DC-350

The feature of differential housing has many holes needed to process in different directions. Through DC-350 and its customized tools, all processes are able to be done in just a one-time clamping, including drilling holes, surfaces, and spherical machining. Furthermore, it also can assure the accuracy of concentricity and perpendicularity, benefitting production efficiency and yield rate.
