Tongtai, a member of the National Mask Machine Production Team, has assembled 92 mask production lines in 45 days with other machine tool manufacturers. The National Mask Machine Production Team won a victory for the national epidemic prevention of Corvid-19 pandemic.

Top stories

Tongtai elites fought for Taiwan's epidemic prevention

With the spread of Corvid-19 pandemic, masks become strategic materials that affect national security. To solve the shortage of masks, more than 30 machine tool manufacturers, called the National Mask Machine Production Team, voluntarily assembled mask production lines. One of the key men behind the team is Chairman Yen.

As President Yen recalled, he began to think about the possibility of helping to assemble the mask production line in late January. On February 4, President Yen contacted the Ministry of the Economy and volunteered to help. Unexpectedly, Habor Precision Chairman Hsu Wen-hsien, and Taiwan Takisawa General Manager Win-

ston Dai also contacted the government at the same time. They made a field survey of the mask production factories and formed a group of over 30 machine tool companies to become a mask machine production team. They were competitors, now they cooperated with each other to complete the mission.

There were 6 colleagues in Tongtai team, including Manager Able Yao, Manager Tsang Lee, Luhe Li, Ruibin Xu, Jiandong Guo and Yinghong Cai. They worked overtime every day, but felt no hardship. Finally, Tongtai and other members accomplished this mission impossible by relying on a belief in "Fighting for Taiwan".

Tongtai is encouraged by thank you cards all over Taiwan

Being one of the National Mask Machine Production Team members, Tongtai has received lots of thank you cards from all over Taiwan. In addition to thanking everyone for the encouragement, Tongtai reminds everyone to follow the epidemic prevention policy, wash hands frequently, wear a mask, and keep social distance.

PCI-SCEMM used 3D printing technology to help France

As the European epidemic continued to heat up, Tongtai's European subsidiary PCI-SCEMM contributed to the effort. The AMTC application center used 3D printing technology to manufacture the frame of the mask elastic adjuster. On April 9th, it was presented to Saint-Étienne University Medical

Center to assist the frontline medical staff to protect their health.

Tongtai got ISO 45001:2018 certificate

Tongtai works hard in developing a healthy and safe workplace for the employees. On August 2018, Tongtai introduced ISO 45001:2018 occupational health and safety management systems and enforced a series of improving measures including system optimization, staff training, and strengthening the executions on improvements, audits, and management after risk evaluations. In January 2020, it was verified by the Metal Industry Research and Development Center (MIRDC). Through the efforts and perseverance of the team, the certificate was successful-

ly obtained on February 27, 2020.

The first machine tool manufacturer to obtain product carbon footprint certification

Tongtai has been verified by meeting the requirements of ISO 14064-1: 2006 last year. This year, SGS has been commissioned by Tongtai to conduct the life cycle Greenhouse Gas emissions verification of Drilling Machine (SDL-620) in accordance with the requirements of ISO 14067:2018. Tongtai became the first machine tool manufacturer to obtain product carbon footprint certification.

Exhibitions

Tongtai and Lenz exhibited together at **IPC APEX Expo2020**

IPC APEX Expo2020 is the largest circuit board and electronic assembly technology exhibition in North America. It is held in San Diego, California on February 4-6 this year. This time, Tongtai and Lenz, exhibited together, attracting a lot of attention.

TTGroup Epidemic Prevention Column

Tongtai also has implemented relevant anti-epidemic measures in the factory according to the regulations of the Epidemic Prevention Center to protect health together.

Temperature monitoring

- 1. Daily temperature monitoring.
- 2. Persons with fever must notify the nurse immediately, wear a mask and see a doctor.
- 3. After the doctor evaluates as a suspected patient, he must immediately notify the nurse, and detailing the contact list.

Home quarantine

- 1. Be in home quarantine for 14 days after 3/19 00:00 AM.
- 2. During the quarantine period, stay in the designated place, do not go out or go abroad, and do not take public transportation.
- 3. If you feel unwell, the health bureau will arrange medical treatment, do not seek medical treatment yourself.
- 4. Measure and record body temperature and physical symptom every morning / night.
- 5. If you can work again after the home quarantine period, you must perform health management for 14 days.

Visitors

- 1. Those who have a history of foreign travel and fever within 14 days, are not allowed to enter Tongtai.
- 2. Both visitors and reception colleagues must wear masks.
- 3. Visitors fill in the "Travel, Contact History, Self-Health Screening Questionnaire" before visiting Tongtai.

Meeting

- 1. Give priority to video conferences instead of physical conferences.
- 2. When holding a physical meeting, all staff should wear masks.

Dining

- 1. Serve lunch boxes since 3/26.
- 2. Do not talk when eating.

The group's subsidiaries have also implemented various epidemic prevention measures.

Shuzhou Tong-Yu

In accordance with the local government's resumption of work regulations, the progress of resumption of work in mid-April has exceeded 90%.

APEC

In addition to encouraging colleagues to wash their hands more, each person was issued a bottle of dry cleaner.

Honor Seiki

In order to prevent group gatherings or community infections, Honor Seiki announced that during the epidemic prevention period, foreign employees should not apply for an overnight stay to avoid the risk of infection.

Quick-TECH

All colleagues wear masks to work, and foreign colleagues also prepare alcohol, and other epidemic personal prevention products.

PCI&ANGER

In response to European social habits, special emphasis is placed on avoiding handshake, kissing and other physical contact greetings, and establishing a safe disassembly and disinfection process for goods and mail sent from areas with severe epidemics, such as Italy. Video conferences were also aligned with parent company Tongtai to establish a transnational communication mechanism for technological epidemic prevention.
