**Standalone Financial Statements for the
Years Ended December 31, 2019 and 2018 and
Independent Auditors' Report**

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
Tongtai Machine & Tool Co., Ltd.

Opinion

We have audited the accompanying standalone financial statements of Tongtai Machine & Tool Co., Ltd. (the "Company"), which comprise the standalone balance sheets as of December 31, 2019 and 2018, the standalone statements of comprehensive income, changes in equity and cash flows for the years then ended, and the notes to the standalone financial statements, including a summary of significant accounting policies.

In our opinion, based on our audits and the audit reports issued by other independent auditors (refer to Other Matter paragraph below), the accompanying standalone financial statements present fairly, in all material respects, the standalone financial position of the Company as of December 31, 2019 and 2018, and its standalone financial performance and its standalone cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers of the Republic of China.

Basis for Opinion

We conducted our audits of the standalone financial statements for the year ended December 31, 2019 in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants Rule No.1090360805 issued by the Financial Supervisory Commission of the Republic of China on February 25, 2020, and auditing standards generally accepted in the Republic of China. We conducted our audits of the standalone financial statements for the year ended December 31, 2018 in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. Based on our audits and the report of other independent auditors, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

As disclosed in Note 3 to the standalone financial statements, the Company has applied the revised Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the FSC starting from 2019. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements for the year ended December 31, 2019. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters identified in the Company's standalone financial statements for the year ended December 31, 2019 are as follows:

Revenue recognition

Specific machine types have different degree of customization based on the customer requirements.

For machine and tool makers, sales revenues may be recognized before the completion of machine or tool installation based on the customization requirements. As a result, we identified revenue recognition as one of the key audit matters.

Refer to Note 4 (m) to the standalone financial statements for the related accounting policies and disclosures on revenue recognition.

The key audit procedures performed in respect of the above key audit matter included the following:

1. We obtained an understanding of internal controls and procedures on the review and approval of reports on completion of installation, and acceptance by customers; we tested compliance with the procedures and operating effectiveness of the internal controls.
2. We performed test of details of recorded revenue against the supporting documents including contracts, reports on completion of installation, and acceptance receipts signed by customer.
3. We obtained details of sales returns and allowances in the current year to the report date and examined if there was any abnormal sales return and allowance for adjustment, and confirmed that recorded transactions were properly authorized.

Inventory valuation

Inventory is material to the Company. As of December 31, 2019, inventory amounted to NT\$2,906,983 thousand, representing 26% of the Company's total assets. In addition, inventory valuation involves critical accounting estimates. Therefore, we identified the inventory valuation as one of the key audit matters. Refer to Notes 4 (e), 5 (b) and 10 to the standalone financial statements for the related accounting policies and disclosures on inventory valuation.

The key audit procedures performed in respect of the above key audit matter included the following:

1. We participated in the physical count of inventory, and observed the physical condition of inventory and checked against the records for any identified obsolete and slow-moving inventory.
2. We obtained inventory aging report, tested the accuracy of inventory aging and evaluated compliance with the inventory accounting policies.
3. We obtained details of inventory valuation and confirmed that inventory items were stated at the lower of cost or net realizable value. We test-checked the cost and market value of inventory against the supporting documents.

Other Matter

Certain investments in subsidiaries accounted for using the equity method were included in the standalone financial statements as of December 31, 2019 and 2018 and for the years then ended based on financial statements audited by other independent auditors. The total of such investments amounted to NT\$1,201,401 thousand and NT\$1,428,116 thousand, representing 11% and 12% of the Company's total assets as of December 31, 2019 and 2018, respectively, and the total share of profit of subsidiaries and associates amounted to NT\$15,504 thousand and NT\$109,415 thousand, representing 28% and 37% of the Company's total profit before income tax for the years ended December 31, 2019 and 2018, respectively.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

Management is responsible for the preparation and fair presentation of the standalone financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and for such internal control as management determines is necessary to enable the preparation of standalone financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with the auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company and its subsidiaries' internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the standalone financial statements,

including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Company to express an opinion on the standalone financial statements. We are responsible for the direction, supervision, and performance of the audit of the Company. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements for the year ended December 31, 2019 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Yu-Shiang Liu and Jui-Hsuan Hsu.

TONGTAI MACHINE & TOOL CO., LTD.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2019 AND 2018 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

Tongtai Machine & Tool Co., Ltd. (the “Company”) was incorporated in January 1969. It is mainly engaged in the manufacturing and selling of machine tools, computer components, computer numerical control lathes and cutting centers.

The Company’s shares have been listed on the Taiwan Stock Exchange since September 15, 2003.

The standalone financial statements are presented in the Company’s functional currency, the New Taiwan dollar.

2. APPROVAL OF FINANCIAL STATEMENTS

The standalone financial statements were approved by the Company’s board of directors and authorized for issue on March 16, 2020.

3. APPLICATION OF NEW AND AMENDED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations of IFRS (IFRIC), and Interpretations of IAS (SIC) (collectively, the “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC) of the Republic of China.

Except for the following, the initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs endorsed and issued into effect by the FSC did not have any material impact on the Company’s accounting policies:

IFRS 16 “Leases”

IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements of both lessee and lessor. It supersedes IAS 17 “Leases”, IFRIC 4 “Determining whether an Arrangement contains a Lease”, and a number of related interpretations. Refer to Note 4 for information relating to the relevant accounting policies.

1) Definition of a lease

The company elects to apply the guidance of IFRS 16 in determining whether contracts are, or contain, a lease only to contracts entered into (or changed) on or after January 1, 2019. Contracts identified as containing a lease under IAS 17 and IFRIC 4 are not reassessed and are accounted for in accordance with the transitional provisions under IFRS 16.

2) The Company as lessee

The Company recognizes right-of-use assets and lease liabilities for all leases on the standalone balance sheets except for those whose payments under low-value asset and short-term leases are recognized as expenses on a straight-line basis. On the standalone statements of comprehensive income, the Company presents the depreciation expense charged on right-of-use assets separately from the interest expense accrued on lease liabilities; interest is computed using the effective interest method. On the standalone statements of cash flows, cash payments for the principal portion of lease liabilities are classified within financing activities; cash payments for the interest portion are classified within operating activities. Prior to the application of IFRS 16, payments under operating lease contracts were recognized as expenses on a straight-line basis. Cash flows for operating leases were classified within operating activities on the standalone statements of cash flows.

The Company elects to apply IFRS 16 retrospectively with the cumulative effect of the initial application of this standard recognized in assets and liabilities on January 1, 2019. Comparative information is not restated.

Lease liabilities were recognized on January 1, 2019 for leases previously classified as operating leases under IAS 17. Lease liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate on January 1, 2019. Right-of-use assets are measured at an amount equal to the lease liabilities, adjusted by the amount of any prepaid or accrued lease payments, the Company applies IAS 36 to all right-of-use assets.

The Company also applies the following practical expedients:

- a) The Company applies a single discount rate to a portfolio of leases with reasonably similar characteristics to measure lease liabilities.
- b) The Company accounts for those leases for which the lease term ends on or before December 31, 2019 as short-term leases.
- c) The Company excludes initial direct costs from the measurement of right-of-use assets on January 1, 2019.
- d) The Company uses hindsight, such as in determining lease terms, to measure lease liabilities.

The weighted average lessee's incremental borrowing rate applied to lease liabilities recognized on January 1, 2019 is 2.35%. The difference between the lease liabilities recognized and future minimum lease payments of non-cancellable operating lease commitments disclosed on December 31, 2018 is explained as follows:

| | |
|---|-------------------|
| The future minimum lease payments of non-cancellable operating lease commitments on December 31, 2018 | \$ 355,007 |
| Less: Recognition exemption for short-term leases and leases of low-value assets | <u>6,464</u> |
| Undiscounted amounts on January 1, 2019 | <u>\$ 348,543</u> |
| Discounted amounts using the incremental borrowing rate on January 1, 2019 | \$ 301,987 |
| Add: Adjustments as a result of a different treatment of extension options | <u>408,046</u> |
| Lease liabilities recognized on January 1, 2019 | <u>\$ 710,033</u> |

3) The Company as lessor

The Company does not make any adjustments for leases in which it is a lessor, and it accounts for those leases with the application of IFRS 16 starting from January 1, 2019.

4) The impact on assets and liabilities as of January 1, 2019 from the initial application of IFRS 16 is set out as follows:

| | Carrying Amount as of January 1, 2019 | Adjustments Arising from Initial Application | Adjusted Carrying Amount as of January 1, 2019 |
|--------------------------------|--|---|---|
| Right-of-use assets | \$- | <u>\$ 710,033</u> | <u>\$ 710,033</u> |
| Lease liabilities - noncurrent | \$ - | \$ 15,431 | \$ 15,431 |
| Lease liabilities - current | <u>-</u> | <u>694,602</u> | <u>694,602</u> |
| Total effect on liabilities | <u>\$ -</u> | <u>\$ 710,033</u> | <u>\$ 710,033</u> |

b. The IFRSs endorsed by the FSC for application starting from 2020

| New IFRSs | Effective Date Announced by IASB |
|--|---|
| Amendments to IFRS 3 “Definition of a Business” | January 1, 2020 (Note 1) |
| Amendments to IFRS 9, IAS 39 and IFRS 7 “Interest Rate Benchmark Reform” | January 1, 2020 (Note 2) |
| Amendments to IAS 1 and IAS 8 “Definition of Material” | January 1, 2020 (Note 3) |

Note 1: The Company and its subsidiaries shall apply these amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2020 and to asset acquisitions that occur on or after the beginning of that period.

Note 2: The Company and its subsidiaries shall apply these amendments retrospectively for annual reporting periods beginning on or after January 1, 2020.

Note 3: The Company and its subsidiaries shall apply these amendments prospectively for annual reporting periods beginning on or after January 1, 2020.

As of the date the standalone financial statements were authorized for issue, the Company is continuously assessing the possible impact that the application of other standards and interpretations will have on the Company’s financial position and financial performance, and will disclose the relevant impact when the assessment is completed.

- c. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

| New IFRSs | Effective Date Announced by IASB (Note) |
|--|--|
| Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture” | To be determined by IASB |
| IFRS 17 “Insurance Contracts” | January 1, 2021 |
| Amendments to IAS 1 “Classification of Liabilities as Current or Non-current” | January 1, 2022 |

Note: Unless stated otherwise, the above New IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.

As of the date the standalone financial statements were authorized for issue, the Company is continuously assessing the possible impact that the application of other standards and interpretations will have on the Company’s financial position and financial performance, and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

- a. Statement of Compliance

The standalone financial statements has been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

- b. Basis of Preparation

The standalone financial statements has been prepared on the historical cost basis except for the financial instruments which are measured at fair value and net defined benefit assets and liabilities which are measured at the present value of the defined benefit obligation less the fair value of the plan assets.

The fair value measurements are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- 1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3) Level 3 inputs are unobservable inputs for the asset or liability.

When preparing its standalone financial statements, the Company used equity method to account for its investment in subsidiaries and associates. In order for the amounts of the net profit for the year, other comprehensive income for the year and total equity in the standalone financial statements to be the same with the amounts attributable to the owner of the Company in its standalone financial statements, adjustments arising from the differences in accounting treatment between standalone basis and consolidated basis were made to investments accounted for using

equity method, share of profit or loss of subsidiaries and associates, share of other comprehensive income of subsidiaries and associates and related equity items, as appropriate, in the standalone financial statements.

c. Classification of current and non-current assets and liabilities

Current assets include:

- 1) Assets held primarily for the purpose of trading;
- 2) Assets are realized within 12 months after the reporting period; and
- 3) Cash and cash equivalents unless the asset is restricted from being used for an exchange or used to settle a liability for more than 12 months after the reporting period.

Current liabilities include:

- 1) Liabilities held primarily for the purpose of trading;
- 2) Liabilities expected to be settled within twelve months after the reporting period; and
- 3) Liabilities without an unconditional right to defer settlement for at least 12 months after the reporting period.

Assets and liabilities that are not classified as current are classified as non-current.

d. Foreign currencies

In preparing the financial statements of the Company, transactions in currencies other than the Company's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the year in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising on the retranslation of non-monetary items are included in profit or loss for the year except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income, in which cases, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are stated at the historical translated amount.

For the purpose of presenting standalone financial statements, the functional currencies of the entities associated with the Company (including subsidiaries in other countries that use currencies which are different from the currency of the Company) are translated into the presentation currency, the New Taiwan dollar, as follows: assets and liabilities are translated at the exchange rates prevailing at the end of the balance sheet date; income and expense items are translated at the average exchange rates for the year. The resulting currency translation differences are recognized in other comprehensive income attributed to the owners of the Company and non-controlling interests as appropriate.

Goodwill and fair value adjustments on identifiable assets and liabilities recognized on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of balance sheet date. Exchange differences arising are recognized in other comprehensive income.

e. Inventories

Inventories consisting of raw materials, supplies, work-in-progress and finished goods are stated at the lower of cost or net realizable value. Inventory write-downs are made by item, except where it may be appropriate to group similar or related items. The net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Raw materials and supplies are recorded at the moving-average cost, and the work-in-progress and finished goods are recorded at cost by the specific identification method.

f. Investments accounted for equity method

The Company uses the equity method to account for its investments in subsidiaries and associates.

1) Investments in subsidiaries

Subsidiary is an entity that is controlled by the Company.

Under the equity method, an investment is initially recognized at cost and adjusted thereafter to recognize the Company's share of profit or loss and other comprehensive income of the subsidiary. The Company also recognizes the changes in the share of other equity of subsidiaries.

Changes in the Company's ownership interest in a subsidiary that do not result in the Company losing control over the subsidiary are accounted for as equity transaction. Any difference between the carrying amount of the investment and the fair value of consideration paid or received is directly recognized in equity.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets and liabilities of a subsidiary recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

The entire carrying amount of the investment is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized is deducted from investment and the carrying amount is net of impairment loss. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases. An impairment loss recognized on goodwill cannot be reversed in a subsequent period.

Unrealized profits or losses on downstream transactions with subsidiaries are eliminated in the standalone financial statements. Profits and losses on transactions with subsidiaries other than downstream are recognized in standalone financial statements only to the extent of interests in the subsidiary that are not related to the Company.

2) Investments in associates

An associate is an entity over which the Company has significant influence and which is neither a subsidiary nor an interest in a joint venture.

The Company uses the equity method to account for its investments in associates. Under the equity method, investments in an associate is initially recognized at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive

income of the associate. The Company also recognizes the changes in the Company's share of the equity of associates.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets and liabilities of an associate at the date of acquisition is recognized as goodwill, which is included in the carrying amount of the investment and is not amortized.

When the Company subscribes for additional new shares of an associate at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment will differ from the amount of the Company's proportionate interest in the associate. The Company should record such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus - changes in capital surplus from investments in associates accounted for using the equity method. If the Company's ownership interest is reduced due to non-subscription of the new shares of the associate, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate is reclassified to profit or loss on the same basis as would be required if the investee had directly disposed of the related assets or liabilities. When the adjustment should be a deduction to capital surplus, but the capital surplus recognized from investments accounted for using the equity method is insufficient, the shortage is deducted from retained earnings.

When the Company's share of losses of an associate equals or exceeds its interest in that associate (which includes any carrying amount of the investment accounted for using the equity method and long-term interests that, in substance, form part of the Company's net investment in the associate), the Company will discontinue recognizing its share of further losses. Additional losses and liabilities are recognized only to the extent that the Company has incurred legal obligations, or constructive obligations, or made payments on behalf of that associate.

Investment in associate is tested for impairment by treating the entire carrying amount of the investment (including goodwill) as a single asset and then compare that carrying amount with the estimated recoverable amount. Any impairment loss recognized is deducted from investment and the carrying amount of the investment is net of impairment loss. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment has subsequently increased.

Gains and losses resulting from upstream, downstream and sidestream transactions between and among the Company and its associates are recognized in the standalone financial statements only to the extent of interests in the associate of entities that are not related to the Company.

g. Property, plant and equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment loss.

Property, plant and equipment in the course of construction are carried at cost. Cost includes professional fees and borrowing costs eligible for capitalization. Such properties are depreciated and classified to the appropriate categories of property, plant and equipment when completed and ready for their intended use.

Freehold land is not depreciated.

Depreciation of property, plant and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effects of any changes in the estimates accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

h. Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation.

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation. Depreciation is recognized using the straight-line method.

On derecognition of an investment property, the difference between the net disposal proceeds and the carrying amount of the asset is included in profit or loss.

i. Computer Software

Computer software with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization. Amortization is recognized on a straight-line basis. The estimated useful lives, residual values, and amortization methods are reviewed at the end of each reporting period, with the effect of any changes in the estimates accounted for on a prospective basis.

j. Impairment of tangible and computer software

At each balance sheet date, the Company reviews the carrying amounts of tangible and computer software to determine whether there is any indication that those assets have suffered any impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Company will estimate the recoverable amount of the cash-generating unit to which the asset belongs. Corporate assets are allocated to the smallest group of cash-generating units on a reasonable and consistent basis of allocation.

Recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

When an impairment loss subsequently is reversed, the carrying amount of the asset or cash-generating unit or assets related to contract costs is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined for the asset or cash-generating unit (net of amortization and depreciation) had no impairment loss been recognized in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

k. Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Transaction costs that are directly attributable to an acquisition or issuance of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

1) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

a) Measurement category

Financial assets are classified into the following categories: Financial assets at FVTPL, financial assets at amortized cost, and investments in equity instruments at FVTOCI.

i Financial asset at FVTPL

Financial asset classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss does not incorporate any dividend or interest earned on the financial asset. Fair value is determined in the manner described in Note 30.

ii Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost, including cash, notes and accounts receivable at amortized cost, other receivables, other financial assets, refundable deposits and long-term notes and accounts receivable, are measured at amortized cost, which equals to gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of such a financial asset, except for:

- i) Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit adjusted effective interest rate to the amortized cost of such financial assets; and
- ii) Financial assets that are not credit impaired on purchase or origination but have subsequently become credit impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.

A financial asset is credit impaired when one or more of the following events have occurred:

- i) Significant financial difficulty of the issuer or the borrower;

- ii) Breach of contract, such as a default;
- iii) It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv) The disappearance of an active market for that financial asset because of financial difficulties.

iii Investments in equity instruments at FVTOCI

On initial recognition, the Company may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

b) Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including accounts receivables).

The Company always recognizes lifetime Expected Credit Losses (ECLs) for trade receivables. For all other financial instruments, the Company recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of a default occurring as the weights. Lifetime ECLs represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represents the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

For internal credit risk management purposes, the Company determines that the following situations indicate that a financial asset is in default (without taking into account any collateral held by the Company):

- i Internal or external information show that the debtor is unlikely to pay its creditors.
- ii When a financial asset is more than 90 days past due unless the Company has reasonable and corroborative information to support a more lagged default criterion.

The impairment loss of all financial assets is recognized in profit or loss by a reduction in their carrying amounts through a loss allowance account.

c) Derecognition of financial assets

The Company derecognize a financial asset only when the contractual rights to the cash flows from the asset expire or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another party.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss, and the cumulative gain or loss that had been recognized in other comprehensive income is transferred directly to retained earnings, without recycling through profit or loss.

2) Equity instruments

Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

3) Financial liabilities

a) Subsequent measurement

Except the following situations, all financial liabilities are carried at amortized cost using the effective interest method:

Financial liabilities held for trading are stated at fair value, with any gain or loss arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss does not incorporate any interest or dividends paid on the financial liability.

b) Derecognition of financial liabilities

The difference between the carrying amount of a financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

4) Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage their exposure to interest rate and foreign exchange rate risks, including cross-currency swap contracts and swap contracts.

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each balance sheet date. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event, the timing of the recognition in profit or loss depends on the nature of the hedging relationship. When the fair value of a derivative financial instrument is positive, the derivative is recognized as a financial asset; when the fair value of a derivative financial instrument is negative, the derivative is recognized as a financial liability.

1. Provisions

Provisions are measured at the best estimate of the cash flows required to settle the present obligation at the end of the balance sheet date, taking into account the risks and uncertainties surrounding the obligation.

Provisions for the expected cost of warranty obligations are recognized at the date of sale of the relevant products at the Company's best estimate of the expenditure required to settle the obligations.

m. Revenue recognition

The Company identifies contracts with customers, allocate the transaction price to the performance obligations and recognize revenue when performance obligations are satisfied.

Revenue from the sale of goods comes from sales of machine. Revenue from domestic sales is recognized when the installation of machine or tool is completed. Revenue from export sales is recognized according to the trade conditions or the completion date of machine installation. The customer has full discretion over the manner of distribution and price to sell the goods and bears the risks of obsolescence. Transaction price received is recognized as a contract liability until performance obligations are satisfied.

Revenue from maintenance and rebuilding are recognized when services are provided.

n. Leasing

2019

At the inception of a contract, the Company assesses whether the contract is, or contains, a lease.

For a contract that contains a lease component and non-lease components, the Company allocates the consideration in the contract to each component on the basis of the relative stand-alone price and accounts for each component separately.

1) The Company as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Lease payments (less any lease incentives payable) from operating leases are recognized as income on a straight-line basis over the terms of the relevant leases. Initial direct costs incurred in obtaining operating leases are added to the carrying amounts of the underlying assets and recognized as expenses on a straight-line basis over the lease terms.

2) The Company as lessee

The Company recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the standalone balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments, which comprise fixed payments, in-substance fixed payments, and variable lease payments which depend on an index or a rate. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily

determined, the Company uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, or a change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Company remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the standalone balance sheets.

Variable lease payments that do not depend on an index or a rate are recognized as expenses in the periods in which they are incurred.

2018

The Company is both lessors and lessees of operating leases. Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Operating lease payments are recognized as expenses on a straight-line basis over the lease term. Contingent rentals are recognized as income or expenses in the year in which the contingency is removed.

o. Employee benefits

1) Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related services.

2) Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as expenses when employees have rendered services entitling them to the contributions.

Defined benefit costs (including service cost, net interest and remeasurement) under defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current service cost) and net interest on the net defined benefit liabilities (assets) are recognized as employee benefits expense in the year in which they occur. Remeasurement, comprising actuarial gains and losses and the return on plan assets (excluding interest), is recognized in other comprehensive income in the year in which it occurs. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Net defined benefit liabilities represent the actual deficit in the Company's defined benefit plans.

p. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1) Current tax

According to the Income Tax Law, an additional tax of unappropriated earnings is provided for as income tax in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences and research and development expenditure to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. A previously unrecognized deferred tax asset is also reviewed at each balance sheet date and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the year in which the liability is settled or the asset realized, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects at the balance sheet date, to recover or settle the carrying amount of its assets and liabilities.

3) Current and deferred taxes for the year

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current tax and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimations and assumptions that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. The effect of a change in an accounting estimate is recognized prospectively by including it in profit or loss in the year of the change, if the change affects that period only, or in the year of the change and future periods, if the change affects both.

Key sources of estimation uncertainty

a. Estimated impairment of financial assets

The provision for impairment of trade receivables is based on assumptions about risk of default and expected loss rates. The Company uses judgment in making these assumptions and in selecting the inputs to the impairment calculation, based on the Company's historical experience, existing market conditions as well as forward looking estimates as of the end of each reporting period. For details of the key assumptions and inputs used, refer to Note 9. Where the actual future cash inflows are less than expected, a material impairment loss may arise.

b. Valuation of inventory

Inventories are stated at the lower of cost or net realizable value, and the Company uses judgment and estimate to determine the net realizable value of inventory at the end of the reporting period. Since the net realizable value of inventory is mainly determined on the basis of future selling price, it might be adjusted significantly.

Accounts receivable

The credit period of the Company's receivables depends on customer classification and product category. The Company makes prudent assessment of all their customers. The counterparties are creditworthy companies; as a result, the significant credit risk is unexpected. In order to minimize credit risk, the management of the Company has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Company reviews the recoverable amount of each individual trade debt at the end of the reporting period to ensure that adequate allowance is made for possible irrecoverable amounts. In this regard, the management believes the Company's credit risk was significantly reduced.

The Company applies the simplified approach to providing for expected credit losses prescribed by IFRS 9, which permits the use of lifetime expected loss provision for all notes and accounts receivables. The expected credit losses on notes and accounts receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of economic conditions at the reporting date. As the Company's historical credit loss experience do not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Company's different customer base.

The Company writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery after the recourse procedures. For accounts receivable that have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of notes and accounts receivables based on the Company's provision matrix.

The provision for warranty claims represents the present value of management's best estimate of the future outflow of economic benefits that will be required under the Company's obligations for warranties under local sale of goods legislation. The estimate was made on the basis of historical warranty trends and may vary with actual as a result of new materials, altered manufacturing processes or other events affecting product quality.

21. RETIREMENT BENEFIT PLANS

a. Defined contribution plans

The Company adopted a pension plan under the Labor Pension Act (the "LPA"), which is a state-managed defined contribution plan in the Republic of China. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

b. Defined benefit plans

The Company adopted the defined benefit plan under the Labor Standards Law, under which pension benefits are calculated on the basis of the length of service and average monthly salaries of the six months before retirement. The Company makes contributions, equal to a certain percentage of total monthly salaries, to a pension fund, which is deposited in the Bank of Taiwan in the name of and administered by the pension fund monitoring committee. Before the end of each year, the Company assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, the Company is required to fund the difference in one appropriation that should be made before the end of March of the next year. The pension fund is managed by the Bureau of Labor Funds, Ministry of Labor (the "Bureau"); the Company has no right to influence the investment policy and strategy.

The amounts included in the standalone balance sheets in respect of the Company's defined benefit plans were as follows:

(Concluded)

An analysis by function of the amounts recognized in profit or loss in respect of the defined benefit plans was as follows:

| | <u>For the Year Ended December 31</u> | |
|-------------------------------------|---------------------------------------|-----------------|
| | <u>2019</u> | <u>2018</u> |
| Operating costs | \$ 2,499 | \$ 2,701 |
| Selling expenses | 559 | 624 |
| General and administrative expenses | <u>214</u> | <u>233</u> |
| | <u>\$ 3,272</u> | <u>\$ 3,558</u> |

Through the defined benefit plans under the Labor Standards Law, the Company is exposed to the following risks:

1) Investment risk

The plan assets are invested in domestic and foreign equity securities, debt securities, and bank deposits, etc. The investment is conducted at the discretion of the Bureau of Labor Funds, Ministry of Labor or under the mandated management. However, in accordance with relevant regulations, the return generated by plan assets should not be below the interest rate for a 2-year time deposit with local banks.

2) Interest risk

A decrease in the government and corporate bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the plan's debt investments.

3) Salary risk

The present value of the defined benefit obligation is calculated by reference to the future

salaries of plan participants. As such, an increase in the salary of the plan participants will increase the present value of the defined benefit obligation.

The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The principal assumptions used for the purposes of the actuarial valuations were as follows:

| | December 31 | |
|--------------------------------------|--------------------|-------------|
| | 2019 | 2018 |
| Discount rate (%) | 0.8 | 1.125 |
| Expected rate of salary increase (%) | 2.25 | 2.25 |
| Turnover rate (%) | 1-30 | 2-30 |
| Voluntary retirement rate (%) | 5-100 | 5-100 |

If possible reasonable change in each of the significant actuarial assumptions will occur and all other assumptions will remain constant, the present value of the defined benefit obligation would increase (decrease) as follows:

| | December 31 | |
|----------------------------------|--------------------|-------------------|
| | 2019 | 2018 |
| Discount rate | | |
| 0.25% increase | <u>\$ (5,600)</u> | <u>\$ (5,914)</u> |
| 0.25% decrease | <u>\$ 6,979</u> | <u>\$ 6,118</u> |
| Expected rate of salary increase | | |
| 0.25% increase | <u>\$ 5,537</u> | <u>\$ 5,857</u> |
| 0.25% decrease | <u>\$ (5,379)</u> | <u>\$ (5,692)</u> |

The sensitivity analysis presented above may not be representative of the actual change in the present value of the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

| | December 31 | |
|--|--------------------|-----------------|
| | 2019 | 2018 |
| The expected contributions to the plan for the next year | <u>\$ 6,150</u> | <u>\$ 6,150</u> |
| The average duration of the defined benefit obligation | 11 years | 11 years |

Note: The capital surplus could be used to offset a deficit and distributed as cash dividends or transferred to capital when the Company has no deficit (limited to a certain percentage of the Company's paid-in capital and once a year).

c. Retained earnings and dividend policy

Under the Company's Articles of Incorporation, where the Company made a profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as legal reserve 10% of the remaining profit, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings shall be used by the Company's board of directors as the basis for proposing a distribution plan, which should be resolved in the shareholders' meeting for the distribution of dividends and bonuses to shareholders.

The Company's dividend policy takes into consideration the entire corporate environment, the growth of industry, long-term financial planning for sustainable development, and stable business development. In the planning of dividend distribution, the Company performs the following steps:

- 1) Determine the best capital budget.
- 2) Determine the need for capital loan to satisfy the best capital budget.
- 3) Determine how much capital could be raised from retained earnings.
- 4) Determine the funds needed to maintain the profitable operations of the Company. After the operations are funded, dividends could be distributed to shareholders. In principle, cash dividends should not be less than 50% of the total dividends distributed.

Legal reserve may be used to offset deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

Under Rule No. 1010012865 and Rule No.1010047490 issued by the FSC and the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRSs", the Company should appropriate or reverse special reserve.

In June 2018, the board of directors of the Company approved to recover the net loss in 2017 from the undistributed earnings in the previous year, and distributed no earnings.

The appropriations of earnings for 2018 were approved in the shareholders' meetings in June 2019. The appropriations and dividends per share were as follows:

| | Appropriation of Earnings | Dividend Per Share (NT\$) |
|-----------------|--------------------------------------|--------------------------------------|
| Legal reserve | \$ 31,223 | |
| Special reserve | 43,694 | |
| Cash dividends | <u>76,448</u> | <u>\$ 0.3</u> |
| | <u>\$ 151,365</u> | |

The appropriations of earnings for 2019 had been proposed in the Board of Directors' meetings in March 2020. The appropriations and dividends per share were as follows:

| | Appropriation of Earnings | Dividend Per Share (NT\$) |
|-----------------|--------------------------------------|--------------------------------------|
| Legal reserve | \$ 5,895 | |
| Special reserve | (43,694) | |
| Cash dividends | <u>50,965</u> | <u>\$ 0.2</u> |
| | <u>\$ 13,166</u> | |

The proposal is subject to the resolution in the shareholders' meeting to be held in June 2020.

g. Employees' compensation and remuneration of directors

To be in compliance with the Company Act, the Company distributed employees' compensation and remuneration of directors and supervisors at the rates no less than 1% and no higher than 5%, respectively, of the pre-tax profit before deduction for employees' compensation and remuneration of directors.

The employees' compensation and remuneration of directors (all in cash) for the year ended December 31, 2019 and 2018 which have been approved by the Company's board of directors were as follows:

| | For the Year Ended December 31 | |
|---------------------------|---------------------------------------|-------------|
| | 2019 | 2018 |
| Employees' compensation | \$ 3,894 | \$ 20,963 |
| Remuneration of directors | 944 | 5,082 |

If there is a change in the proposed amounts after the annual standalone financial statements are authorized for issue, the difference is recorded as a change in accounting estimate.

There was no difference between the actual amounts of employees' compensation and remuneration of directors paid and the amounts recognized in the standalone financial statements for the year ended December 31, 2018. Because of the net operating loss in 2017, employees' compensation and remuneration of directors were not accrued.

Information on the employees' compensation and remuneration of directors resolved by the Company's board of directors are available at the Market Observation Post System website of the Taiwan Stock Exchange.

25. INCOME TAX

a. Major components of income tax benefit recognized in profit or loss are as follows:

f. Information about unused investment credits

As of December 31, 2019, investment credits comprised of the following:

| Laws and Statutes | Tax Credit Source | Remaining Creditable Amount | Expiry Year |
|----------------------------------|--------------------------------------|------------------------------------|--------------------|
| Statute for Upgrading Industries | Research and development expenditure | \$ <u>4,306</u> | 2020 |

g. Income tax assessments

The income tax returns of the Company through 2017 have been assessed by the tax authorities.

26. EARNINGS PER SHARE

The net profit and weighted average number of ordinary shares outstanding in the computation of earnings per share were as follows:

Net profit for the year

| | <u>For the Year Ended December 31</u> | |
|---------------------------------------|--|-------------------|
| | 2019 | 2018 |
| Attributable to owners of the Company | \$ <u>58,947</u> | \$ <u>312,225</u> |

Weighted average number of ordinary shares outstanding (in thousands of shares)

| | <u>For the Year Ended December 31</u> | |
|--|--|----------------|
| | 2019 | 2018 |
| Weighted average number of ordinary shares in computation of basic earnings per share | 254,827 | 254,827 |
| Effect of potentially dilutive potential ordinary shares: | | |
| Employees' compensation | <u>477</u> | <u>1,212</u> |
| Weighted average number of ordinary shares used in the computation of diluted earnings per share | <u>255,304</u> | <u>256,039</u> |

Since the Company offered to settle the compensation paid to employees by cash or shares, the Company assumed that the entire amount of the compensation would be settled in shares and the resulting potential shares are included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the shares have a dilutive effect. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the shareholders resolve the number of shares to be distributed to employees at their meeting in the following year.

27. INVESTMENT IN SUBSIDIARIES-WITHOUT IMPACT OF CONTROLLING

In December 2019, the subsidiary Tongan acquired residual shares of MBI. The transaction was accounted for as equity transaction since the Company did not cease to have control over the subsidiary, reduced the capital surplus by NT\$10,622 thousand and the retained earnings by NT\$3,207 thousand (net of income tax of NT\$3,457 thousand).

In September 2019, the Company subscribed for additional new shares of Tong-Yeh at a percentage different from its existing ownership percentage. The transaction was accounted for as equity transaction since the Company did not cease to have control over the subsidiary, and reduced the capital surplus by NT\$224 thousand.

In October 2018, subsidiary Tongan acquired additional shares of MBI, and increased its continuing interest. The transaction was accounted for as equity transaction since the Company did not cease to have control over the subsidiary, and reduced the capital surplus by NT\$95 thousand (net of income tax of NT\$23 thousand).

In April 2018, the Company subscribed for additional new shares of TTM at a percentage different from its existing ownership percentage, and acquired the remaining ownership from non-controlling interests. The transaction was accounted for as equity transaction since the Company did not cease to have control over the subsidiary, and adjusted capital surplus, net of income tax of NT\$2,734 thousand, was as follows:

| | Amount |
|---|------------------|
| The difference between consideration received or paid and the carrying amount of the subsidiaries' net assets during actual disposal or acquisition | \$ 9,336 |
| Changes in percentage of ownership interests in subsidiaries | <u>1,605</u> |
| | <u>\$ 10,941</u> |

| Property, plant and equipment | \$ 15,349 | \$ 22,612 |
| Payable for equipment | 9,372 | 17,815 |
| Prepayment for equipment | <u>-</u> | <u>(8,049)</u> |
| Cash paid | <u>\$ 24,721</u> | <u>\$ 32,378</u> |

29. CAPITAL MANAGEMENT

The Company manages its capital to ensure that, as a whole, it will be able to continue as going concerns; the Company uses operating capital effectively and optimize debt and equity balance. The overall strategy of the Company has not significantly changed over in 2019.

The key management personnel of the Company reviews the capital structure periodically. As part of the review, the key management personnel considers the cost of capital and the risks associated

with each class of capital. Based on recommendations of the key management personnel, in order to balance the overall capital structure, the Company may adjust the amount of dividends paid to shareholders, the number of new shares issued or repurchased, and the amount of new debt issued or existing debt redeemed.

The capital structure of the Company consists of net debt and equity without any need for complying with other external capital requirements.

30. FINANCIAL INSTRUMENTS

a. Fair value of financial instruments that are not measured at fair value

Except as detailed in the following table, the Company believes the carrying amounts of financial asset and liabilities recognized in the standalone financial statements approximate their fair values.

b. Fair value of financial instruments that are measured at fair value on a recurring basis

1) Fair value hierarchy

| December 31, 2019 | Level 1 | Level 2 | Level 3 | Total |
|--|-------------------|-----------------|------------------|-------------------|
| Financial assets at FVTOCI - non-current | | | | |
| Domestic listed shares | \$ 121,572 | \$ - | \$ - | \$ 121,572 |
| Domestic unlisted shares | <u>-</u> | <u>-</u> | <u>58,692</u> | <u>58,692</u> |
| | <u>\$ 121,572</u> | <u>\$ -</u> | <u>\$ 58,692</u> | <u>\$ 180,264</u> |

| Swap contracts | <u>-</u> | <u>21</u> | <u>-</u> | <u>21</u> |
| | <u>\$ -</u> | <u>\$ 520</u> | <u>\$ -</u> | <u>\$ 520</u> |

There was no transfer between Level 1 and Level 2 for the years ended December 31, 2019 and 2018.

2) Reconciliation of Level 3 fair value measurements of financial assets

| | Equity Instruments - Financial Assets at FVTOCI | |
|--|--|------------------|
| | For the Year Ended December 31 | |
| | <u>2019</u> | <u>2018</u> |
| <u>Financial assets</u> | | |
| Balance at January 1 | \$ 56,005 | \$ 49,420 |
| Change in fair value recognized in other comprehensive income | <u>2,687</u> | <u>6,585</u> |
| Balance at December 31 | <u>\$ 58,692</u> | <u>\$ 56,005</u> |

3) Valuation techniques and input applied for the purpose of measuring Level 2 fair value measurement

Derivative instruments used the quoted price of bank as the basis of the fair values.

4) Valuation techniques and assumptions applied for the purpose of measuring Level 3 fair value measurement

If there are no market price for reference, fair values were estimated by assessment approach.

For unlisted shares, fair values were determined based on the net worth of companies.

c. Categories of financial instruments

| | December 31 | |
|---|--------------------|-------------|
| | <u>2019</u> | <u>2018</u> |
| <u>Financial assets</u> | | |
| Financial assets at FVTPL | \$ - | \$ 7,192 |
| Financial assets at amortized cost (1) | 3,104,743 | 3,378,663 |
| Financial assets at FVTOCI | | |
| Equity instruments | 180,264 | 171,071 |
| <u>Financial liabilities</u> | | |
| Financial liabilities at FVTPL | 8,257 | 520 |
| Financial liabilities at amortized cost (2) | 4,707,715 | 6,026,716 |

1) The balances included financial assets at amortized cost, which comprise cash, notes and accounts receivable (including related parties), other receivables, other financial assets (current and non-current), refundable deposits, and long-term notes receivable.

2) The balances included financial liabilities at amortized cost, which comprise short-term borrowings, short-term bills payable, notes and accounts payable (including related parties), other payables and long-term borrowings (including those due in one year).

d. Financial risk management objectives and policies

The Company's major financial instruments include equity investments, notes and accounts receivable, notes and accounts payable, short-term and long-term borrowings, short-term bills payable and lease liabilities. The Finance Department provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports which

analyze exposures by degree and magnitude of risks. These risks are market risk (including foreign currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Company minimizes the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Company's policies approved by the board of directors, which provided written principles on foreign currency risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Company does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

1) Market risk

The Company's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (refer to (a) below), interest rates (refer to (b) below) and other price (refer to (c) below).

There has been no change to the Company's exposure to market risks or the manner in which these risks are managed and measured.

a) Foreign currency risk

The Company is exposed to foreign currency risk due to sales, purchases, capital expenditures and equity investments denominated in foreign currencies. Exchange rate exposures are managed within approved policy parameters utilizing swap contract, cross-currency swap contract, and foreign exchange forward contracts.

The carrying amounts of significant foreign currency monetary assets and liabilities at the balance sheet date are disclosed in Note 34.

The Company is mainly exposed to the USD and CNY. The following table details the Company's sensitivity to a 3% increase and decrease in the functional currency against the relevant foreign currencies. The sensitivity rate used when reporting foreign currency risk internally to key management personnel and representing management's assessment of the reasonably possible change in foreign exchange rates is 3%. The sensitivity analysis included only outstanding foreign currency denominated monetary items.

| | USD Impact | | CNY Impact | |
|-------------------------------|---|--------------------|---|--------------------|
| | For the Year Ended December 31 | | For the Year Ended December 31 | |
| | 2019 | 2018 | 2019 | 2018 |
| Pre-tax profit or loss (Note) | <u>\$ (10,560)</u> | <u>\$ (11,074)</u> | <u>\$ (48,085)</u> | <u>\$ (58,449)</u> |

Note: These were mainly attributable to the exposure of the USD and CNY (including cash, accounts receivable and payable (including related parties), other receivable, other payable and short-term and long-term borrowings), which were not hedged at the balance sheet date.

In management's opinion, the sensitivity analysis was unrepresentative of the inherent foreign exchange risk because the exposure at the balance sheet date did not reflect the exposure during the period. Foreign currency sales change according to customer order and business cycle.

b) Interest rate risk

The Company is exposed to interest rate risk because the Company borrowed funds at both fixed and floating interest rates. The risk is managed by the Company by maintaining an appropriate mix of fixed and floating rate borrowings.

The carrying amounts of the Company's financial liabilities with exposure to interest rates at the balance sheet date were as follows:

| | December 31 | |
|-------------------------------|--------------------|-------------|
| | 2019 | 2018 |
| Fair value interest rate risk | | |
| Financial liabilities | \$ 1,188,047 | \$ 900,000 |
| Cash flow interest rate risk | | |
| Financial liabilities | 1,792,840 | 1,804,249 |

The sensitivity analysis below was determined based on the Company's exposure to interest rates for both derivative and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of each liability outstanding at the end of the reporting period was outstanding for the whole year. The interest rates change of 1% increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates of financial liabilities had been 1% higher/lower and all other variables were held constant, the Company's pre-tax profit would have been lower/higher by NT\$17,928 thousand and NT\$18,042 thousand for the year ended December 31, 2019 and 2018, respectively.

c) Other price risk

The Company is exposed to equity price risk through their investments in domestic listed shares.

If equity prices had been 1% higher/lower, the pre-tax other comprehensive income for the years ended December 31, 2019 and 2018 would have been higher/lower by NT\$1,216 thousand and NT\$1,151 thousand, as a result of the changes in fair value of financial assets at FVTOCI respectively.

2) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. As of the balance sheet date, the Company's maximum exposure to credit risk is the carrying amount of the financial assets on the standalone balance sheets.

The Company adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

Except for the following customer, the Company did not have significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The

Company's concentration of credit risk in receivables (including notes and accounts receivable, long-term notes receivable, overdue receivables and other receivables) by customer was as follows:

| Customer | December 31 | |
|-----------|---------------------|---------------------|
| | 2019 | 2018 |
| Company A | \$ 863,211 | \$ 1,158,121 |
| Company B | <u>151,025</u> | <u>530,776</u> |
| | <u>\$ 1,014,236</u> | <u>\$ 1,688,897</u> |

3) Liquidity risk

The Company manages liquidity risk by monitoring and maintaining a level of cash deemed adequate to finance the Company's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The following table details the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The table has been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Company can be required to pay. The table included both interest and principal cash flows. Specifically, bank loans with a repayment on demand clause were included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities were based on the agreed repayment dates.

To the extent that interest flows are at floating rates, the undiscounted amount was derived from the interest rate at the end of the balance sheet date.
